

Influenced by Brad Frost’s “Atomic Design” methodology, along with mentors and the modular style of the React JavaScript framework, living style guides and design systems allow designers and developers to make **better** products more **efficiently**.

Pairing  
visual  
examples  
with  
working  
code  
enables  
something  
akin to  
building  
with legos.

FILE STRUCTURE  
ORGANIZATION

Thinking modularly  
creates clean, reusable code —  
maximizing the time and effort  
of both designer and developer.
